André de Paula Terceiro

Brazilian, divorcied, 40 years
Address: Rua (street) Doutor Eloy Chaves, 178 – bl. 5 – ap. 102 – Jundiaí- São Paulo – SP
Note: I can work in São Paulo and others cities
Telephone: (11) 98289-9112
E-mail: andreterceiro@yahoo.com.br, andrerapt82@gmail.com, andre@terceiro.com.br

Curriculum summary:

Data processing technician since 12/2001. I've been working with web programming since 2003, for example with Ruby, PHP, ASP, Actionscript (Flash), .NET (Visual Basic and a little bit of C#). Groovy and Javascript. And Arduino. I use object orientation, MVC (mainly CakePHP, Code Igniter and Zend Framework, but I've studied others like Symfony), Ajax (via Xajax or directly with Jquery), visual effects with Jquery etc. I use template engines (various, depending on technology). In Flash I currently program AS3, integrating with PHP via XML or AMFPHP, but I've already programmed in AS2. The main types of systems I've developed are websites, administrative systems, various reports, e-commerce and
touchscreen multimedia for events (involving integration with external hardware, face detection via camera etc). PHP Brazil Moderator on Facebook until Facebook blocked my account without giving me a chance to try to explain myself. I made another account...

Goal:
Programming / systems analysis

Formation::
- Post Graduation in Software Engineering – São Judas Tadeu University – Completed in 07/2013
- Technologist in Precision Mechanics (Mechatronics/Robotics) – FATEC. Completed in 07/2007
- Computer Technician (former data processing technician course) – ETE Camargo Aranha. Completed on 12/2001
- Electronics technician – ETE José Rocha Mendes. Completed on 07/2001

Certifications:
- CCNA - Cisco (2002-2005)
- CCAI – Cisco (Netacademy CCNA instructor)

Complementary courses and congresses:
- Various Meetups
- Arduino with Blender: MIS. Completed in 08/2009
- PHP Conference 2006 and 2012
- Linux - IBTA – systems and network administration. Completed on 11/2003
- Cisco Networking Academy. Completed in 2001
- Installation and maintenance of computers – Senai. Completed on 06/1999

Professional experience

Devops programmer trough Decision: de 10/2022 a 01/2023
Funçao: Senior devops programmer

I was allocated by Decision in a client that they asked me not to reveal. There in main of time I worked in Jenkins pipelines, I was not not stay there until the migration to Gitlab. In some cases I developed a PHP parser to help getting the information from some files and set the right string to insert in Jenkins (e.g.: cutting some parts, concatenating information). It was a nice place to work. I was not fired, I opted to exit to face other challenges.

Decision, allocated in Assaí: from 05/2022 to 08/2022
Role: Senior devops programmer
Example of activities: At Assaí I learned to work on "Low Code" platforms from Digibee and Automation Anywhere.
I also made a system in Node.JS that integrated with DynamoDB and SQS. I used TypeScript in this system, Jest for the tests (in addition to the exported Postman collections that ended up serving for testing as well), the AWS SDK to integrate with AWS, I documented with Swagger, I also made a very rich documentation in README.md. On the way I tried to achieve the goals, I even used my personal Amazon account for testing. It was one nice experience, but hiring PJ in most cases is to fulfill a goal specific, so I think I didn't stay there long.

Riachuelo: from 06/2020 to 02/2022
Role: Senior devops programmer
Example of activities: I am a happy member of Riachuelo's center of technological excellence. There my role is to provide tools for the development teams to work with. I've worked for example with Lambda AWS, Jenkins, Node.JS and the programming languages Groovy and Javascript.

Self-employed while not in a company: from 04/2020 to 06/2020
Role: Senior programmer
Examples of activities: web freelances, tutorial recording, various software development

Swide: from 03/2020 to 04/2020
Role: Senior programmer
Examples of activities: I basically worked in an online bingo team.
I faced a new challenge at Swide.A big, ambitious, cool Project..I did a lot of things, for example 14 branches in 7 days, counting the time to learn the company's own framework.
I was hired for a project. Unfortunately the customer wanted to abort. I left with a feeling of accomplishment. That's why the time is short.
It was a nice experience.

Fundação Cásper Libero: from 03/2014 to 02/2020
Role: Senior programmer
Examples of activities: There is a link to my LinkedIN at http://www.terceiro.com.br. See there please.
For professional growth, I faced a new challenge. In FCL programming was in PHP (using Wordpress, Zend Framework, Symfony and Laravel for example), Ruby, Phyton, Node (Javascript), Java and applications with Cordova. We took care of Gazeta Esportiva, Gazeta FM and AM, TV Gazeta and São Silvestre.

Promo Sapiens: from 07/2008 to 03/2014
Role: Systems Analyst.
Examples of activities: There is a link to my LinkedIN profile at http://www.terceiro.com.br. See there please.
Below is a description of some works: e-commerce All Sell (http://www.allsell.com.br), multimedia for Samsung, Avon, Telefônica and Ideal Invest (more than 20, using Arduino, Visual Basic, Flash, PHP , touchscreens, face detection via camera, barcode detection, data registration, activation of fluorescent lamps via Flash, multimedia synchronization on different PCs via network, etc.), Lig Lig website (old, administrative system in PHP, display data, AJAX, effects with Jquery etc), Hotma (old, http://www.hotma.com.br, administrative system in PHP, integration with Flash), system for

generating email marketing for Ação Informática (system PHP administrative and HTML generation for triggering), administrative system and Flash integration for Promo Sapiens website (old), virtual poll and reports for Samsung, system for generating email signatures and inserting into email programs (Outlook, Thunderbird, Macintosh Mail etc) for di verses clients (formerly we used http://www.ff.rec.br/sim/assinatura_email/), interaction with sensors and LEDs for Telefônica (impact measurement via accelerometer and activation of LEDs through a microcontroller – Arduino's Atmega 168), Some things in Girafa's website (in "tableless" with Jquery) (http://www.girafa.com.br)

Grito Ateliê Digital: from 10/2007 to 04/2008
Role: Web programmer
Examples of activities: There is a link to my LinkedIN profile at http://www.terceiro.com.br. See there please.
Description of some works: website http://www.sabrinamatar.com.br/ - old version (modules for administrative system and front-end), Editora C4 website (http://www.editorac4.com.br) system administrative, data presentation, photo slide show), extensive research form for Sesi / Ação Educativa in 2008, e-mail marketing tool customization (formerly 2Send – the agency unfortunately is closed) , tool customization for project management (Rolim Consult), administrative system and showcase for the Casa das Construções website (http://www.casadasconstrucoes.com.br/ - I don't know why they changed the website), various contributions to the website Conceiro Brazil (http://www.conceitobrazil.com.br/).

Self-employed: from 01/2005 to 09/2007 as main activity; since 10/2007 as a complementary activity
Role: web programming (PHP), maintenance of networks, servers and PABX;
Examples of activities: There is a link to my LinkedIN at http://www.terceiro.com.br. See there please.
The description of some works follows: reports for the Anuncio Certo site (old version of the site – the company closed), participation in the Names 2 Glue site (http://www.names2glue.com.br – the site was in Flash previously and not now,and I made the e-commerceof the website), changes on the Atrasorb website (http://www.atrasorb.com.br). For Torresan Eventos: administrative system and reports for registration of receptionists, forms and reports for research carried out in events, equipment maintenance, network and internal server.

TXT Marcom: from 06/01/2003 to 15/06/2004
Role: Web programming (PHP), maintenance of servers, network and PABX and internal support
Examples of activities: There is a link to my LinkedIN at http://www.terceiro.com.br. See there please.
Description of some jobs: registration system for events and printing of identification cards on thermal printers, generation of various reports, internal systems, maintenance on Linux and Windows servers and internal support for users.

FASTDATA Informática LTDA: from 06/06/2002 to 12/15/2002
Role: Cisco Netacademy Instructor
Activity: Official Cisco Systems training (Cisco Networking Academy), preparatory to CCNA certification.

Cisco Systems (outsourced): from 02/15/2002 to 06/01/2002
Role: Customer service (Help desk)

Languages
Constant reading of various technical documents in English, intermediate in conversation in this language. I'm in Duolingo's diamond division.
